

EZEQUIEL MAGI

WORDPRESS DEVELOPER | WEBSITE MANAGER | FULL STACK DEVELOPER

Argentina | +54 9 11 6020-6608 | emagi@webcare.com.ar | [linkedin.com/in/ezequiel-magi/](https://www.linkedin.com/in/ezequiel-magi/)

PROFESSIONAL SUMMARY

WordPress developer and website manager with hands-on experience taking production websites from approved design through implementation, deployment, maintenance and continuous improvement. Strong background in WordPress, Elementor, HTML, CSS, JavaScript and PHP, with practical ownership of performance, security, integrations, hosting coordination, DNS and troubleshooting. Experienced working with clients, designers, project managers and technical teams in remote environments.

CORE SKILLS

WordPress & CMS: WordPress, Elementor Pro, Theme Builder, WooCommerce, Contact Form 7, Yoast SEO

Back End & Integrations: PHP, REST APIs, webhooks, Google Analytics, Google Tag Manager, third-party services

Front End: HTML5, CSS3, JavaScript, responsive design, Figma-to-code, accessibility

Operations: Hosting, DNS, SSL, migrations, updates, backups, caching, security, production troubleshooting

PROFESSIONAL EXPERIENCE

Founder & WordPress Website Manager | WebCare

2025 - Present

- Building a WordPress maintenance and website-care service for small businesses, focused on reliability, updates, security, performance, analytics and ongoing support.
- Defining workflows for preventive maintenance, issue diagnosis, client communication and continuous improvement.

Frontend / WordPress Developer | NOVAZ Group

March 2023 - July 2026

- Led development implementation for corporate WordPress websites from approved Figma designs, choosing when to use Elementor and when custom HTML, CSS and JavaScript were more appropriate.
- Defined implementation architecture, selected plugins, participated in production deployments and maintained applications through updates, compatibility checks, bug fixes and new features.
- Worked with project managers, designers, client stakeholders and hosting teams to explain trade-offs, troubleshoot production issues and deliver within fixed deadlines.
- Configured caching, SEO fundamentals, analytics, tag management, forms and security tooling.

Frontend & WordPress Developer | Independent

2020 - Present

- Built and supported websites for small businesses using WordPress, Elementor, HTML, CSS, JavaScript and PHP.
- Handled hosting coordination, migrations, SSL, subdomains and DNS records including A, CNAME, TXT, MX and DKIM across Hostinger, WNPowr, AWS Lightsail, Cloudflare, GoDaddy and NIC Argentina.

Tech Instructor | Informatic Training Center S.A.

2007 - 2020

- Taught technology and software topics, translating technical concepts into clear, practical instruction for learners with different experience levels.
- Prepared training materials and guided hands-on exercises, strengthening communication, documentation and problem-solving skills.

SELECTED PROJECT

Lead WordPress Implementation | NOVAZ for Tecnodata S.A. Chile

2023 - 2026

- Led the implementation of a multi-page corporate website for a Chilean B2B technology company, balancing design fidelity with client editability and long-term maintainability.
- Used Elementor as the primary system and isolated custom HTML, CSS and JavaScript for complex sections; the approach remained maintainable through roughly three years of production use and change.
